[Message]

Dear President Clinton,

Although I understand it's place and the significance and the affects on the economy and the world, I feel very strongly that all consumers should have the right to know what is in their food. For this reason, I am asking that you immediately propose to label all genetically engineered food.

Please do not accept anything less from Congress or the House. Amongst many of the positive things that have happened in your Presidency, let this be numbered with them.

Most sincerely,

92N-0139
